## Company Profile

We are an I.T Company, based in India, involved in solution and customization, serving to the relevant needs of various business houses & individuals. In 2+ years of existence we have encompassed various fields of work, ranging from custom made applications across many industries giving them solutions, enablers, cutting costs, easing the way of working & making the impossible, possible and staying on top of the technology by producing the best results in the training industry.

We have developed and successfully implemented software solutions, which were the result of in-depth analysis, use of latest technologies, choice of the right solution framework and friendly user interface followed by high levels of testing. The solutions maintained integrity and provisions for future scale ups.

Along with the technical proficiency that we possess today, our applications stand apart due to a few basic features like:

- In-depth analysis of environment
- Focus on the user perspective
- Friendly user interface
- Usage of latest technology
- Scalable solutions for future requirements
- Economical solutions providing good return on investment

We have a team of highly skilled, qualified, experienced I.T professionals. We have implemented a number of solutions in the field of web technologies, client server & mobile technologies for clients of international repute. As a young organization, we have the required expertise and maturity in implementing these solutions.

## Our Services

Delight Solution focus on being solution partners to our customers in growing their business by working with them in their business needs with technological and operationally efficient solutions.

We entrust with planning, building and enhancing more services to meet current and future requirements. The fact that sets us apart from the rest of the services industry is that we are the only company with the ability to build, operate and manage technology with cost effective services regardless of the any constraints in place.

Vertical enhancements in our services include deep insight into each technical field so that highest quality services can be given to our clients in all the areas of the services provided by us.
